

Technology Plan 2012-2014
Westville-New Durham Township Library

Goals and Objectives:

Offer electronic information services to patrons and allow patrons access to the internet.

Objective: To provide material not already available at the library

To explore and implement automation technology in the library

Objective: To make library operations more efficient and helpful for patrons

Explore entering the E-rate program to cut technology costs

Objective: To better use library budget for library needs

Create a library website using AccessPoint

Objective: To provide information for library patrons and meet with state standards.

Assessment of Current Technology and Needs:

We currently have three computer stations complete with printers available for patron use. There are two computers available for staff use.

We also provide Wi-fi during library hours to patrons with their own laptops or wi-fi capable gadgets.

Training:

Staff is trained by computer literate local volunteers.

Staff assists patrons with basic computer and internet functions as time allows.

Budget:

The library's operating fund pays for the library's computer costs.

Evaluation:

Statistics are kept on patron computer use.

The technology plan will be reviewed to determine goals met and current needs.
